

Pouring Out Your Layers:

1. If you'd like to include sand in your terrarium, layer it on the top, bottom, or in between.
2. Add about 2 to 3 inches of pebbles into your container.
3. Next, take your potting soil and fill it about 3/4 of the way up your container.
4. Now, place your plant into the soil. Make sure to leave enough space around it for the remaining items.
5. Place some or all of your collected objects or remaining materials in the space around your plant.
6. You're done!
